* Annualized. Yield is a more accurate reflection of the Fund's current earnings than total return.

The 7-day yields refer to the income generated by an investment in the Fund over a 7-day period. This income is then annualized. The 7-day effective yield is calculated similarly, but the income earned is assumed to have been reinvested. The effective yield will be slightly higher than the current yield because of the compounding effect of this assumed reinvestment.

Performance shown prior to the 12/31/99 inception of the American Beacon Money Market Select Fund ("Select Fund") is that of the American Beacon Money Market Fund – Institutional Class ("Beacon Fund"). The returns have not been adjusted for any difference between the fees and expenses of the Select Fund and the historical fees and expenses of the Beacon Fund. Because the Beacon Fund had higher expenses, its performance was worse than the Select Fund would have realized during the same period. A portion of the fees charged to the Select Fund was waived through 2001. Performance prior to waiving fees was lower than the actual returns shown for periods through 2001.
